SIGNIFICANT TREE NOMINATION FORM

6. REASON FOR SIGNIFICANCE (please tick applicable boxes)

For a tree/s to be considered for listing on the Significant Tree Register, it should satisfy at least two of the criteria, especially if the main attribute is visual/aesthetic value.

Cultural, Social and/or Commemorative Values	<ul style="list-style-type: none">Highly valued by the community for reasons of strong religious, spiritual, cultural, educational, political or other social associations, including Indigenous culture and heritage.	
Historic Values	<ul style="list-style-type: none">Associated with a well-known public figure or group.Reflecting a specific era of landscape design.Associated with a heritage-listed place.Forming part of a recognised historic garden or park.	
Botanic/ Scientific Values	<ul style="list-style-type: none">Of high horticultural or genetic research/educational value.An important source of propagation stock, including specimens that are particularly resistant to disease or climatic extremes.	
Ecological Values	<ul style="list-style-type: none">Important for threatened flora, fauna, ecosystems or natural landscapes.Rare, threatened or locally uncommon species or ecological communities.Provide a significant habitat element for rare or threatened fauna.Indigenous remnant trees that predate urban development. Significant remnant communities are not included in the Register – however, other smaller fragmented elements of natural heritage may be included.	
Visual/ Aesthetic Values	<ul style="list-style-type: none">Situated within a very prominent location or context.Outstanding for height, trunk circumference or canopy spread.Highly visible and could be considered a landmark.Exhibit an unusual growth form or physical feature, including unusually pruned forms.Contribute significantly to the establishment of local character.	

7. FURTHER EXPLANATION OF SIGNIFICANCE
